MiCORES - Biomedical Research Core Facilities Services

MiCORES is an iLab Solutions system used by Biomedical Research Core Facilities (BRCF) to perform ordering, billing, and scheduling of scientific products and services. As of 8/9/2016, the following Cores are supported:

- Bioinformatics Core
- Epigenomics Core
- Flow Cytometry Core
- Metabolomics Core
- Microscopy & Image Analysis Laboratory
- Proteomics & Peptide Synthesis Core
- Sample Preservation Freezer (Freezer Farm)
- Transgenic Animal Model Core
- Vector Core

MiCORES can be accessed at the following link with a Level-1 (UMICH) password:

https://umich.corefacilities.org

PDF Quick start guide here!

- Accounting and Billing Issues
- Problems with the Service

- MiCORES - Core Management
- MiCORES - Lab Management

Accessing MiCORES

- U-M faculty, staff, and students can access MiCORES with their university credentials.
- External faculty and staff who use iLab Solutions / Agilent CrossLab at their "home" institution can access the U-M instance using their "home" credentials.
- Individuals associated with the University of Michigan without university credentials and without "home" institution credentials will need to obtain a sponsored account through the MCommunity Sponsor System managed by ITS. Please send a request to msishelp@umich.edu for assistance obtaining a sponsored account.

Problems with Registration

Some accounts, especially those of individuals involved in the earlier setup and testing, are missing an authentication context. iLab Solutions can resolve the issue. To begin a support ticket with iLab Solutions, click this email template link.
1. With a web browser, go to the following link: https://umich.corefacilities.org
2. Click the link labelled **here**.

3. After the **WebLogin** screen loads, authenticate with a uniqname and **Level-1 (Kerberos)** password.

4. If prompted regarding sharing personal information with the IT Service Provider, click the **Confirm** button.
5. When logging in for the first time, the **iLab Account Registration** screen will appear. Supply the requested information, particularly a PI and phone number if not present, and click the **register** button. The **PI** field determines which cores will be available.

6. On initial login, when the **home** screen appears for the first time, choose the correct time zone and click **update time zone**.

**Requesting Access to Additional Cores**

1. After logging in to MiCORES, in the lefthand menu under the **core facilities** heading, click the **list all cores** link.

2. The screen will display a list of **Core Facilities at University of Michigan**. Select a core from the list of cores.
   - If the current account does not have access to the core, the page will indicate the core requires an additional access request to use the core. Fill the provided field with any additional information and click the **Send access request** button.
   - If the current account has access to the core, the home page for the core will load.
      - To learn more about the available services, click the **about** tab.
      - To request services, click the **request services** tab.
      - For cores with equipment, click the **schedule equipment** tab.

---

**Placing MiCORES Service Requests**
The following sequence is the general work flow for placing service requests:

1. The customer logs into MiCORES and places a request with the core.
2. The core provides a quote for the services requested.
3. The customer logs into MiCORES and agrees to the work and projected cost (quote).
4. If necessary, the Principal Investigator or a Financial Administrator review the request.
5. The core completes the work and bills the researcher.
6. If appropriate, summary results are made available for download through MiCORES.
