Haiku and Canto for Mobile Devices

Haiku and Canto are mobile applications designed to give U-M physicians, mid-level providers (NPs and PAs), house officers and fellows limited patient access whether in the clinic, in the hospital or on call. Haiku and Canto offer an abridged version of MiChart and are not intended to replace the full application on a notebook or desktop workstation.

- **Haiku** is the Epic (MiChart) mobile application available for use on mobile devices like the iPhone and Android.
- **Canto** is the Epic (MiChart) mobile application available for use on the iPad.

Each application provides access to MiChart (Epic) tasks focused on viewing patient information and offers additional features including:

- viewing provider schedules
- reviewing lab results
- accessing certain folders within the In Basket
- ePrescribing medications (iPhone only)
- capturing clinical photos or videos (iPhone and iPad only)

**FYI**

VPN is not required to access Haiku/Canto from a mobile device.

**Installation Instructions**

More information and installation instructions are available at the following internal link available to machines on the UMHS network or with a VPN connection.
