Electromyography Training Manual

Section 1: Preface

- Introduction
- EMG Rotation Objectives
- EMG Rotation Skills List

Section 2: Schedules

- EMG/Neuromuscular Neurology Resident Rotation Weekly Schedule
- Introductory EMG Schedule
- Neuromuscular Fellow Conference Schedule

Section 3: Laboratory Function

Section 4: Nerve Conduction Techniques

- Nerve Conduction Manual
- Table 1 - Normal Values UMMC
- Table 2 - Electrodes
- Nerve Conduction Studies: Principles, Problems, and Sources of Error
- Brachial Plexus: Schema (with labels)
- Brachial Plexus: Schema (without labels)
- The Utility of Various Sensory Nerve Conduction Responses in Assessing Brachial Plexopathies

Section 5: Repetitive Stimulation

- Repetitive Stimulation
- Workshop on Repetitive Stimulation
- AAEE Minimonograph #33: Electrodiagnostic Approach To Defects of Neuromuscular Transmission

Section 6: Needle EMG

- Terminology of Electromyography
- Needle Electromyography
- Rating of Fibrillation and Fasciculation for EMG Reports
- Anatomic Localization

Section 7: Single Fiber EMG

- Electrophysiologic Studies of Neuromuscular Transmission: Single Fiber Electromyography
- AAEM Minimonograph #25: Single-Fiber Electromyography

Section 8: Polynuropathy

- Pathophysiology of Peripheral Neuropathies
- Axonal vs. Demyelinating Polynuropathy
- Acquired Inflammatory Demyelinating Polynuropathies: Clinical and Electrodiagnostic Features

Section 9: Mononeuropathies

- Mononeuropathy I: Median Nerve
- Mononeuropathy II: Peroneal, Ulnar and Radial Nerves
- Mononeuropathy III: Controversial or Unusual Compressive Neuropathy

Section 10: Myopathies

- Myopathy Evaluation and Diagnosis
- Myotonia
- Inflammatory/Metabolic Myopathies
- Congenital/Storage Myopathies
- Differential Diagnosis of Myotonic Disorders

Section 11: Motor Neuron Disease

Section 12: Plexopathy

Section 13: Radiculopathy

- Radiculopathy
- Tables
  - EMG and Nerve Conduction: Abnormalities Localizing the Lesion Site in Suspected Ulnar Neuropathy
  - EMG and Nerve Conduction: Abnormalities Localizing the Lesion Site in Wristdrop
  - EMG and Nerve Conduction: Abnormalities Localizing the Lesion Site in Footdrop
  - Clinical Differentiating Factors in Femoral Neuropathy

Section 14: Anomalous Innervations
Section 15: Protocols

- Facial Paralysis
- Periodic Paralysis
- Carpal Tunnel
- Upper Extremity Pain
- Lower Extremity Pain
- Polyneuropathy
- Weakness
- Polyradiculopathy

Section 16: Lecture Handouts

- AAEM Minimonograph #26: The Electrodiagnosis of Carpal Tunnel Syndrome
- AAEM Minimonograph #31: The Electrodiagnosis of Ulnar Neuropathy at the Elbow
- AAEM Minimonograph #34: Polyneuropathy: Classification by Nerve Conduction Studies and Electromyography
- Neuromuscular Complications of Cancer
- An Approach to the Diagnosis of Neuromuscular Disease in the Floppy Infant
- AAEM Minimonograph #36: Basic Concepts of Electricity and Electronics in Clinical Electromyography
- Introduction to Muscle Pathology

Section 17: Appendix

- Suggested Reading List
- AAEE Recommended Educational Requirements
- AAEE Examination Objectives, Content, Examples
